Brand protection & final production

Before the identity is released commercially:

1. Redraw the selected Hangul lettering as original vector paths.

2. Confirm spelling, pronunciation and calligraphic legibility with a Korean-language expert.

3. Test the one-line Latin wordmark at small sizes and on dobok embroidery.

4. Prepare AI/SVG/PDF/EPS masters plus PNG exports in color, black and white.

5. Define final clear-space and minimum-size rules from the finished vectors.

6. Check trademark availability and rights for commercial merchandise.

STATUS: Creative brand concept. The visual mockup is not yet an approved, production-ready vector logo.
